 saumytri07@gmail.com |  +91-7007175956

PROFESSIONAL SUMMARY

Motivated Machine Learning Engineer with strong foundations in Python, machine learning, and API-based deployment. Hands-on experience in building end-to-end ML solutions, from data preprocessing to real-time model serving. Passionate about developing scalable, production-ready AI systems and continuously learning new technologies

EDUCATION

National Institute of Technology Agartala, Tripura Master of Technology in Artificial Intelligence	July 2025 - Present
United College of Engineering and Management, Prayagraj Bachelors of Technology in Computer Science and Engineering	July 2020 - July 2024
Shree Mahaprabhu Public School Intermediate (NIOS)	April 2019 - April 2020
Shree Mahaprabhu Public School High School (CBSE)	April 2017 - April 2018

PROFESSIONAL EXPERIENCE

Machine Learning Engineer VendorsKart Pvt. Ltd. • Built scalable data preprocessing pipelines using Python, Pandas, and SQL for automated product handling • Designed and deployed real-time ML prediction APIs using FastAPI with optimized service latency. • Collaborated with cross-functional teams to integrate ML models into production systems. • Improved model performance by tuning hyperparameters and feature engineering techniques.	13 Aug 2024 – 11 May 2025
--	---------------------------

TECHNICAL SKILLS AND INTERESTS

- **Programming Languages:** Java, Python, JavaScript
- **Web & Backend Technologies:** HTML, CSS, React.js, Node.js, RESTful APIs
- **Frameworks & Libraries:** NumPy, Pandas, Matplotlib, Bootstrap
- **Database:** SQL, MySQL, MongoDB
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, SDLC, STLC, Agile Methodologies
- **Soft Skills:** Project Management, Team Leadership, Problem Solving, Analytical Thinking

PROJECTS

- Intelligent Bike Accessories Recommendation System**
- Developed content-based recommendation engine for personalized accessory suggestions based on bike specifications.
 - Optimized ML inference pipeline with FastAPI integration for real-time predictions across product catalog.
 - Implemented scalable architecture supporting concurrent user sessions with automated data workflows.
- Handwritten Digit Recognition**
- Built a machine learning model for real-time digit recognition using Python.
 - Optimized preprocessing and inference pipeline for fast and accurate predictions.
 - Designed the solution for real-world automation use cases, including banking and logistics systems.
- Co-Exist: Sustainable Living Platform**
- Developed a full-stack web platform promoting sustainable living practices.
 - Implemented user authentication, personalized dashboards, and interactive UI features.
 - Created an analytics-driven dashboard to encourage data-informed decision-making.

CERTIFICATION

- College Summer Training: Completed intensive training in Python Programming, Machine Learning, and Java Development with hands-on algorithm implementation.
- GATE 2025 Qualified

LEADERSHIP AND ACHIEVEMENTS

- Public Speaking: Delivered technical presentations and participated in coding competitions.
- Project Leadership: Successfully coordinated technical projects from requirements to deployment.
- Project Leadership: Engineered ML solutions with high accuracy deployed in production environments.
- Competitive Exam: GATE 2025 Qualified.
